

Magnus Lixenstrand

Automation developer with twelve years in sales

+46 73 806 20 52 mlixenstrand@gmail.com magnuslixenstrand.com

linkedin.com/in/magnus-lixenstrand Jönköping, Sweden

Twelve years in sales taught me where work gets stuck. Now I remove that friction as the sole developer of Nordic Metal Trade's business system. I'm looking for roles in automation, systems integration, ERP management, IT project management or business process development, in Jönköping or remote.

Experience

| Development and automation | Sales and business

Aug 2025–present

Nordic Metal Trade AB

Systems Developer and System Owner

- Sole developer and maintainer of a web-based business system covering CRM, material inquiries, quotes, orders, purchasing, inventory, certificates and transport planning. Around ten users; the tools save the team more than 20 hours a week.
- Cut quote handling from about 30 to 5 minutes for 20–30 quotes a week, with contract-based freight rates built into each quote.
- Integrated the system with Fortnox, carrier APIs (Shiplink, Unifaun/nShift), Microsoft 365 and PostHog.
- Built an AI assistant into the system that answers colleagues from the company's own documents.
- Develop with AI agents (Claude Code, Codex) in a custom workflow with code review and automated tests on self-hosted CI runners.
- Digitised more than 500 certificates and migrated them in about a month with no data loss.

Tech: Python, Flask, FastAPI, SvelteKit, TypeScript, MySQL, Docker, Google Cloud, GitHub Actions

Nov 2024–present

Bostadsrättsföreningen Österlandet nr 7

Chair of the Board housing cooperative

- Lead the board and day-to-day management of a cooperative with eight apartments.
- Cut the monthly fee by 5% for 2026 through new procurement and cost analysis, while keeping reserves among the strongest 10% in Sweden.

Jul 2019–Jul 2025

Nordic Metal Trade AB

B2B Sales Representative with development responsibility 80% sales, 20% development

- Sold steel and metals to industrial customers across Europe, from needs analysis and quoting to negotiation, orders and account development.
- Accounted for roughly half of the company's total sales in 2021, through a small number of large accounts.
- Automated the quoting process step by step, from Excel and VBA to a custom web flow connected to Fortnox. It became the foundation of today's business system.
- Built integrations between Fortnox, Trello, Google Drive and Gmail, and with the supplier Ahola.

Jan 2017–Aug 2019

AD infinitum recycling

Business Developer, waste management

- Mapped client waste flows and sold cost-cutting solutions, from first call to contract.

2017

3 Sverige B2B Sales Specialist, based in Cyprus

Oct 2015–2017

Travel in Asia and Australia

Career break with temporary work in hospitality

Jan 2013–Oct 2015

Eniro

Senior Sales Lead and System Ambassador

- Three promotions in under three years. Led the team whenever the manager was away.
- Led the local rollout of a new Google-based business system and trained colleagues in new ways of working.

Feb 2009–Jun 2011

Sveacom AB Telesales Representative

Skills

Development	Python, FastAPI, Flask, SvelteKit, TypeScript, MySQL, REST APIs, VBA
Operations	Docker, Linux, Google Cloud, GitHub Actions, Fortnox, Microsoft 365, n8n
AI	Claude Code, Codex, agent workflows with code review, AI assistants
Business process	Requirements analysis, process mapping, project management, system rollout, user support
Commercial	B2B sales, negotiation, procurement, budgeting

Personal projects

Smart home. Home Assistant with 232 devices, 161 automations and 16 rooms, over Zigbee, Matter/Thread and MQTT. Connects lighting, heat pumps, Nord Pool electricity prices, a robot vacuum and a robot lawn mower.

Hemma. A custom dashboard in SvelteKit and FastAPI that the family uses to run the home from phone and tablet: real-time updates over WebSocket, roles for family and guests, push notifications and an AI assistant that can only propose approved actions.

Household finances. Web app in SvelteKit, FastAPI and SQLite that pulls transactions from Toshl and tracks budget, savings and loans on a home server, reconciled nightly.

Education

John Bauer-gymnasiet, upper secondary diploma, 2005–2008

Self-taught systems development through the business system at Nordic Metal Trade and personal projects, ongoing
